

OHMNI® ROBOT FOR HEALTHCARE

RESOURCE GUIDE

We've been speaking with a number of Ohmni users in children's hospitals and many are interested in learning more about how to use their Ohmni Robot to boost engagement and access for their patients. Below are some of the uses customers have shared with us in addition to technical information that may help you augment your use.

KIDS DRIVE OHMNI ROBOT

Some hospitals have closed-circuit TV. Kids drive Ohmni down to the studio to participate in whatever programming is happening.

Use Ohmni to go pick out a gift during a holiday event.

Set up a scavenger hunt or obstacle course where kids have to cruise through a space with Ohmni.

CALL OUT BINGO NUMBERS

PARTICIPATE IN ARTS AND CRAFTS

Alternative uses have been seen where Ohmni has been used in parallel with dog therapy! Kids take dogs on a walk using Ohmni.

Just for fun let kids venture out of their room on the robot and explore their nearby surroundings through the robot's driving controls.

Check out this blog post featuring Phoenix Children's Hospital for photos and more ideas of ways to use Ohmni in the Zone.

INVITE FAMILIES AND GUESTS TO DRIVE OHMNI

Children's Healthcare of Atlanta uses Ohmni to help bring the fun to kids confined to their rooms.

[READ MORE](#)

Parents, sibling, grandparents

- Visit their newborn sister, brother, grandchild in the NICU.
- Grant access to visitors while maintaining a safe distance.

Celebrities or special guests

- They can call into the robot to interact with the kids. Sports figures can dial-in and have robots be dressed in their jerseys.
- Magicians or caricature artists have dialed into Ohmni to teach kids how to do magic tricks or to create a new piece of art.
- Some schools allow speakers and other teachers to dial in.

INCREASED MEDICAL ACCESS

Doctors at Azria Health use Ohmni Robot to visit remotely and interact directly with their patients.

[READ MORE](#)

Ohmni is left in the hospital and called into by doctors to **help diagnose visually** recognizable conditions like a stroke. Being able to diagnose the patients remotely reduces the time it would take to start potentially life-saving procedures at any time of the day.

Ohmni has been used at a skilled nursing facility to allow medical staff to observe all the patients every day.

Similarly, medical consultants who do not need physical access to their patients have been able to do virtual check-ins and remotely treat patients without needing PPE.

TAKE OHMNI ON FIELD TRIPS

The Child Life and Arts Therapy Department of The Mount Kravis Children's Hospital uses Ohmni to let patients walk their therapy dogs.

[READ MORE](#)

Hospitals are pushing the boundaries in the most amazing ways by taking Ohmni on the road to many destinations. These hospitals have used Ohmni to let patients attend a picnics, meet the firefighters at the local station, visit museums and even walk therapy dogs.

Ohmni can go virtually anywhere and meet with anyone. Where will your Ohmni go?

HELPFUL GUIDES

Ohmni Share Access

You can share access to Ohmni Robot with anyone, anywhere by adding them as a user.

BLUETOOTH CONTROLLER FOR EASIER DRIVING

For possible driving alternatives, check out our Bluetooth controller. The range of use between the controller and robot is limited to the bluetooth range of the robot (~10m/32ft uninterrupted). This controller is best suited for short-range application, but gives a fun tactile way to control Ohmni!

FUN ACCESSORIES

Give your Ohmni some character, kids love to personalize Ohmni.

Use the Hanger attachment to dress Ohmni® with a shirt or jersey.

[ACCESSORIES](#)

Create a custom cover to add a logo or photo to your Ohmni®.

[CUSTOM COVER](#)

Some customers have access to a 3D-printer and link to make their own attachments like a pointer, tray or badge holder.

OHMNI CLOUD SOLUTIONS

Ohmni Cloud Solutions is a software and services subscription that provides enterprise-level features to help you better deploy and manage your multiple Ohmni Robots. It provides additional data and management features easily accessible through the graphic-rich dashboard.

MOBILE HOTSPOTS

If you experience wifi connection issues, consider a mobile hotspot that attaches to Ohmni. Check with your local mobile hotspot rental companies to test what provider and model works best for your hospital.

[READ MORE](#)

For extra ports use our USB Expansion Hub to power the mobile hotspot as Ohmni operates through a powered USB 3.0 port.
