

## **Jared Go, Cofounder and CTO**

Jared is an entrepreneur who loves bringing together research, engineering, and design to solve real-world problems. As co-founder and CTO of OhmniLabs, Jared is passionate about making robots that can be truly useful in people's homes and lives. An avid maker and roboticist, he experimented with generations of robot designs to help him better connect with his family on the opposite coast of the US. Previously, Jared was the CTO and founding team member at Hobnob where he developed patented network algorithms and hardware to make cellular networks faster and more reliable. He is an expert with decades of experience in algorithms, software development, and computer graphics. His broad experience also covers mechanical and electrical engineering, as well as industrial design. Jared is a former Stanford PhD student and Stanford Graduate Fellow. He holds a degree in Computer Science from Carnegie Mellon.
