

Tingxi Tan, CPO and Cofounder

Tingxi brings expertise in platform building, software infrastructures and cloud system designs to the OhmniLabs team. He is a robotics enthusiast and is experienced in hardware to software integrations. Bitten by the entrepreneurial bug early in life, Tingxi has dabbled in different industries ranging from retail jewelry to cloud services consulting. Previously, he worked in a research lab in academia and specialized in large scale distributed computing and cloud computing methodologies and at an enterprise networking startup as an engineering director where he lead a multidisciplinary team to make hardware and software products for cellular networks. He served as a Weapon Systems Officer for the Singapore Armed Forces and learned extensive leadership skills.

Tingxi holds a MSc in Computer Science from the University of Calgary and BS in Applied Mathematics from the University of Western Ontario.
